

AI NORTH STAR DISCOVERY WORKSHOP

Your teams are already using AI. The question is whether you're leading it.

- A **complimentary 4–6 hour executive working session** that gives leadership teams a clear, coordinated direction for AI across the organization.
- This is a focused, practical session built around your **business priorities, operational challenges, and the decisions** your leadership team needs to make next.
- In one session, you gain clarity on how to turn AI into a **true strategic advantage**.

WHAT TO EXPECT DURING THE SESSION

Business Reality Alignment

AI opportunities are mapped to operational priorities, financial pressures, and competitive risks.

Current State Assessment

High-value use cases are identified, ranked by expected business impact, and supported with a clear decision framework for future initiatives.

North Star Definition

Current AI usage across teams is assessed to surface organizational, data, and workflow constraints that could affect adoption.

WHAT YOU LEAVE WITH

- A comprehensive AI readiness assessment
- A prioritized roadmap with quantified value hypotheses
- Implementation sequencing guidance
- Governance and operating model guidance
- Reusable templates supporting scalable execution

WHY R-CUBED + CLUSTR

R-Cubed brings deep experience in enterprise transformation, master data and organizational change. Clustr brings hands-on expertise deploying AI systems in real operational environments. Together, we focus on making AI executable inside complex organizations.

**Zero Cost. Zero Risk.
Immediate Clarity.**
